Modular kiosk systems made in Germany

▲ **checkPOINT** - 1000 times approved, versatile, the standard!

Polygon kiosk systems are optimised with regard to functionality and usability. This comprises glare-free displays, high usability of the components as well as easy access for maintenance or service. The front door's panel technology makes the system future-proof. New upgrade components can be fitted even after years at low cost.

▲ **disPOSer** - the space prodigy

Elaborate manufacturing with attention to every detail, use of high-quality components, quality management according to ISO 9001 - a product made in Germany.

▲ **s-Modul** and **i-Modul** - digital signage column and interactive kiosk

Individual custom made developments

There are many reasons for a custom made development: individual appearance, distinctive and highly recognisable. With more than 80 implemented projects, Polygon is the undisputed market leader in the field of custom made design and individual development of kiosk systems. A usage and ergonomic concept that matches exactly the customer's needs and a special casing configuration

warrant a distinctive appearance. Materials and surfaces can be chosen to match the environment as well as the customer's corporate design. Custom developed terminals can even be more economical than standard products that we have, due to the required flexibility and integrated features not needed for the realisation of your specific project.

▲ Lufthansa **CheckIn-Terminal** for Höft & Wessel

▲ **Point of Interest** for the VW Autostadt

▲ **Self Checkout** and **Point of Service** for IBM/Fressnapf

All-round service

Our comprehensive expertise in all relevant fields concerning kiosk systems, self service and digital signage is the result of our world wide network, our long term relationships with our customers, suppliers and partners and last but not least the unique know-how of our staff.

This enables us to handle even the most complex assignments and implement the best solution in cooperation with you.

Conception

For the conception of your project we can not only be your competent partner for technology (software and hardware) and implementation, but can as well, due to our experience in the fields of marketing and advertising, bring in our know-how in terms of marketing strategies and profitability of your project.

Company profile

Since 1992 Polygon implements kiosk projects for trade fair companies, car industry, retail and logistic enterprises. The scope of applications reaches from simple company presentations for trade fair participations and lobby solutions through to customer loyalty programmes and demanding self service and self checkout applications.
